Subject Index

Volume 29

Absorption
  food iron, 1142
  vitamin A, in ascariasis, 1372
Acupuncture, treatment of obesity, 832
Addictive risk factors, in atherosclerosis, 579
Adipocytes, isolated, and lipogenesis, 540
Age, of obesity onset, relation to weight reduction success, 626
Albumaid XP, treatment for phenylketonuria, 351
Albumin, serum, as measure of protein status in elderly, 522
Alcoholism
  energy wastage in, role of hepatic microsomal enzymes, 90
  serum lipids in patients with and without cirrhosis of the liver, 1122
Amino acids
  levels across forearm muscle and splanchnic bed after protein meal, 340
  plasma, in septic patients receiving parenteral nutrition, 380
Anemia, incidence in residents of Missouri, 1158
Animal proteins, comparison of effect of, on nonheme iron absorption, 859
Announcements, 487, 591, 685, 807, 928, 1021, 1060, 1175, 1330, 1485
Anorexia, produced by intermediary metabolites, 552
Anthropometric evaluation
  of body composition in newborns, 61
  of nutritional status, 46
Anthropometric indicators, age-dependent, effects of birth registration errors, 585
Antibody response, in children with protein-calorie malnutrition, 836
Anti-insulin serum, effect of, on the hepatic lipid metabolism of BHE rats, 1190
Arterial elastin, 1021
Ascariasis, vitamin A absorption, 1372
Ascorbic acid: *see also* Vitamin C
Ascorbic acid
  and vitamin B_{12} stability, 645
  infusion on carbohydrate tolerance, 1339
  lack of in rhesus monkey, 825
Atherosclerosis, addictive risk factors, 579

Bacteria, diet and large bowel cancer, 1410
Bacterial flora, alteration in, due to dietary fiber supplementation, 1443
Bedouins, 25-hydroxycholecalciferol levels, 1104
Behavior therapy, for weight control, 880
Bile acid
  effects of ethanol on, 1007
  excretion, in infants, 546
Biliary composition, effect of cholesterol feeding, 698
Bilirubin, serum, in Gilbert's syndrome, 705
Birth registration, errors, effects on age-dependent anthropometric methods, 585
Bleeding, gastrointestinal, in experimental blind loop syndrome, 754
Blind loop syndrome, experimental, gastrointestinal bleeding and iron absorption, 754
Blindness, and xerophthalmia in Northeast Brazil, 116
Blood pressure, in rats fed common breakfast cereals, 529
Blood volume, in severe protein-calorie malnutrition, 25
Body composition, of black, white, and Puerto Rican newborns, anthropometric evaluation, 61
Body weight, nomographic assessment, 302
Bone, effects of vitamin D on, 1300
Book Reviews, 124, 232, 320, 594, 930, 1062
Bowel dysfunction, and natural fiber, 1427
Bran
  effect of raw and cooked, on intestinal transit and feces, 1474
  effect on plasma lipids in monkeys, 905
Breakfast cereals, common, nutritional responses in rats, 529
Breast milk
  composition, 441
  lactose, nitrogen, and protein contents, 1134

Calcium, effects of phosphate salts on absorption of nonheme iron, 1142
Calorie, balance in human nutrition, 1093
Calorie efficiency, in small-for-date dwarfism, 38
Calorie/nitrogen ratios, in septic patients receiving parenteral nutrition, 380
Calorigenesis, in obesity, 1108
Calorigenic response, in obese and nonobese women, 1108
Cancer
  colon
    and diet, 1417
    metabolic epidemiology of, 1455
  diet and nutrition, 1035
  gastrointestinal, and diet, 1432
  large bowel
    and diet, 1410
    production of urinary phenols by gut bacteria and their possible role in causation of, 1448
Carbohydrates, of fractionated serum proteins in protein-calorie malnutrition, 146
Carbohydrate tolerance, ascorbic acid injusion on, 1339
β-Carotene, in breast milk, 441
Celiac disease, and vitamin B_6 nutriture, in children, 760
Celiac sprue, and zinc nutrition, 371

Abstracts submitted to the 16th Annual Meeting of the ASCN were published as an addendum to the July 1976 issue. Authors and subjects are not indexed here.

Cereal fiber, changes in fecal composition and colonic function due to, 1468
Children: *see also* Infants
consuming all daily protein in one meal, 78
convalescent malnourished, and isoosmotic tube feeding formula, 496
malnourished, identification through inner-city school health service, 216
Mexican-American, and lactose malabsorption, 19
physical and intellectual development in, fed five different dietary staples, 1242
preschool, and zinc nutrition, 734
preschool Navajo Indian, and protein-calorie malnutrition, 657
protein utilization, and sweat nitrogen losses, 600
relationship of lactose intolerance to milk intolerance, 192
signs of vitamin A deficiency in, effect of massive doses of vitamin A, 110
undernourished, serum and small intestinal immunoglobulin levels, 392
with and without celiac disease and vitamin B_6 nutriture, 760
with phenylketonuria, treated with Albumaid XP, 351
Cholesterol
blood levels, effect of dieting, 784
dietary, effects on lactating women and breast-fed infants, 54
feeding of, effect on biliary composition, 698
in rats fed common breakfast cereals, 529
in tissues of chickens with hypercholesterolemia, 187
plasma, after low-fat meal, 535
serum, effect of diet and exercise, 512
Cholesterol metabolism, effects of ethanol on, 1007
Cholestyramine, effect on plasma lipids in monkeys, 905
Cigarette smoking, relationships between oral contraceptives and plasma vitamins A, E, C, and plasma triglycerides and cholesterol, 1216
Cirrhosis, liver, serum lipids in alcholic patients, 1122
Coenzyme A, relationship with pantothenic acid and human chronic ulcerative and granulomatous colitis, 1333
Colitis, human chronic ulcerative and granulomatous, 1333
Colon cancer
and diet, 1417
metabolic epidemiology of, 0000
Colonic function, changes in, due to cereal fiber, 1468
Composite meals, iron absorption from, measurement, 772
Conjugase activity, of rat uterus, cyclic variations, 288
Contraceptives, oral, effect on alanine and glycine metabolism, 956
Copper
in mature human milk, 242
serum levels in total parenteral nutrition, 70
Cystine, and methionine lacking in diet, 1367

Deficiency, vitamin D, and rickets, 1307
Development
intellectual, retardation of due to environmental deprivation and malnutrition, 912
physical and intellectual in Philippine children fed five different dietary staples, 1242
Diabetes
and peripheral nerve abnormalities, 402
effects of diet on hyperglycemic diabetic men, 895
jejunal enzyme adaptation in obese adult-onset diabetics, 989
glycemia and glucosuria after various breakfast meals, 716
need for special foods and sweeteners, 727
Diarrhea, fecal steroids in, 949
Diet
bacteria and large bowel cancer, 1410
colon cancer and, 1417
dietary control and exercise training in postmyocardial infarction patients, 900
during pregnancy, effect on reproductive efficiency in rhesus monkey, 136
effects of cholesterol and saturation of fat in, on serum cholesterol in man, 1184
effect on serum cholesterol and triglyceride reduction, 512
fiber in, as protective factor in disease, 417
high carbohydrate, high fiber on hyperglycemic diabetic men, 895
in Gilbert's syndrome, effect on serum bilirubin, 705
in hyperglycemic diabetic men, 895
intake data in study of gastrointestinal cancer, 1432
in the elderly, as measure of protein status, 522
jejunal enzyme adaptation in obese adult-onset diabetics, 989
isonitrogenous, nitrogen retention and plasma amino acids of adults, 1343
isoosmotic tube feeding formula, in convalescence from malnutrition, 496
low fiber content in Connecticut, 87
low-protein, and urinary nitrogen excretion, 639
nutrition and cancer, 1035
physical and intellectual development in Philippine children fed five different dietary staples, 1242
plasma and urinary amino acids and sulfur metabolites in young men fed diet devoid of methionine and cystine, 1367
Dietary agent, sucrose polyester, for lowering plasma cholesterol, 1204
Dietary cholesterol, and serum lipids in diet of man, 1184
Dietary fiber
binding of components of mixed micelle to, 1461
supplementation in man, 1437, 1443
Dieting, to lower blood cholesterol, 784
Disease, role of dietary fiber as protective factor, 417
Diverticular disease, fecal characteristics contrasted in irritable bowel syndrome and, 1480
Drug abuse, energy wastage in, role of hepatic microsomal enzymes, 90
Dwarfism, small-for-date, nitrogen balance and calorie efficiency, 38

Eating habits, modification of, due to dietary fiber supplementation, 1437
Ecological settings, growth and development of Yugoslav populations, 1051
Editorial, 1
EDTA, effect on dietary non-heme iron absorption, 614
Education, nutrition, effect on nutritional status, 675
Elastin, arterial, 1021

Elderly, and protein status measurement, 522
Energy balance, during recovery from malnutrition, 1073
Energy intake, variations, and human protein requirements, 280
Energy wastage, in alcoholism and drug abuse, role of hepatic microsomal enzymes, 90
Enteritis, regional, and folic acid absorption, 182
Enterobacteriaceae, in jejunal microflora, 1397
Enteropathy, idiopathic, and nutrient loss in rural Iran, 169
Environmental deprivation, in retarding intellectual development, 912
Enzymes, hepatic microsomal, role in energy wastage of alcoholism and drug abuse, 90
Errata, 812, 932, 1063, 1176
Erythrocytes, and vitamin B_{12} activity, 791
Essential fatty acid deficiency, in adults receiving total parenteral nutrition, 976
Ethanol
  effects on bile acid and cholesterol metabolism, 1007
  versus wine in human nutrition, 1093
Ethiopia, famine, 1016
Exercise, effect on serum cholesterol and triglyceride reduction, 512
Exercise training, dietary control in postmyocardial infarction patients, 900
Excretion, urinary creatinine and lean body mass, 1359

Famine, in Ethiopia, 1016
Fatty acids
  deficiency, reversed by cutaneous safflower oil, 398
  dietary, effects on lactating women and breast-fed infants, 54
  essential, infant requirements, 559
  in margarines, 331
Fecal bile acid, and neutral sterol in children and adults, 1196
Fecal characteristics, contrasted in irritable bowel syndrome and diverticular disease, 1480
Fecal composition, changes in, due to cereal fiber, 1468
Fecal flora, enzymic activity, 1455
Fecal physiology, alteration in, due to dietary fiber supplementation, 1443
Fecal steroids, in diarrhea, 949
Feces, effect of raw and cooked bran on, 1474
Feeding, infant, world trends, 1227
Fiber
  and bowel dysfunction, 1427
  cereal, changes in fecal composition and colonic function due to, 1468
  dietary
    as protective factor in disease, 417
    binding of components of mixed micelle to, 1461
    supplementation in man, 1437, 1443
  in Connecticut diets, 87
Fiber content, of Iranian breads, effect on intestinal folic acid absorption, 799
Folate composition, of rat uterus, cyclic variations, 288
Folate content, of Iranian breads, 799
Folate levels, in Iranian population, 794
Folate polyglutamates, in meat during storage and processing, 1393
Folates, availability in foods, 376
Folic acid
  absorption in regional enteritis, 182
  intestinal absorption, effect of bread fiber content, 799
Food
  and folate availability, 376
  for diabetics, 727
  intake and preferences, after intestinal bypass surgery, 779
  sugar identification and lactose content, 428
Food iron absorption, in human subjects, 859, 1142

Gastrointestinal cancer, dietary intake data in study of, 1432
Gilbert's syndrome, serum bilirubin in, effect of diet changes, 705
Glucose, in prolonged parenteral nutrition, substitution by Intralipid, 255
Glucosuria, in diabetics, after various breakfast meals, 716
Glutathione reductase assay, flavin adenine dinucleotide-dependent, for riboflavin nutriture, 663
Glycemia, in diabetics, after various breakfast meals, 716
Growth
  effect of protein-calorie or protein deprivation on growth of fetal brain, 1149
  in normal and depleted weanling rats, 817
  in rats fed common breakfast cereals, 529
  of children consuming all daily protein in one meal, 78
  of infants fed a zinc supplemented formula, 1114
  zinc turover of mice during, 814
Growth retardation, in malnutrition, functional significance, 3
Gut bacteria, production of urinary phenols by, and their possible role in causation of large bowel cancer, 1448

Hair
  chromium concentration in pregnancies, 1069
  root morphology changes, in protein-calorie malnutrition, 502
Hair tissue, in the elderly, as measure of protein status, 522
Health and Nutrition Examination Survey, clinical and anthropometric findings, 918
Hemodialysis, vitamin B_{12} levels and nerve conduction velocity, 691
Hemoglobin, in rats fed common breakfast cereals, 529
Hepatic lipid metabolism, effect of anti-insulin serum on, of BHE rats, 1190
High-altitude exposure, in women, nutritional aspects, 604
Human chorionic gonadotrpin, in weight reduction, 940
Human milk
  influence of vitamin B_6 intake on content, 961
  protein, nitrogen, and lactose contents, 1127
25-Hydroxycholecalciferol, levels in bedouins in the Negev, 1104
Hypercholesterolemia, in chickens, and cholesterol contents of tissues, 187
Hyperglycemia, effects of diet in hyperglycemic diabetic men, 895
Hyperlipemia, Intralipid-induced, relationship to pulmonary function, 127
Hypertriglyceridemia, endogenous familial, 1122
Hypophosphatemia, x-linked, and autosomal recessive vitamin D dependency, 1315

Immunoglobulins
and antibody response in children with protein-calorie malnutrition, 836
serum and small intestinal, in undernourished children, 392
Infants: *see also Children*
behavior of, relation to nutrition and maternal characteristics, 305
breast-fed, effects of diet on plasma cholesterol, 54
consuming soybean or cow's milk and bile acid excretion, 546
essential fatty acid requirements, 559
nutritional rickets in, 1222
vitamin E and C levels, 766
world trends in feeding, 1227
zinc deficiency during total parenteral alimentation for diarrhea, 197
Infection, increased serum phenylalanine-tyrosine ratio, 997
Interferon, decreased production by leukocytes in marasmus, 758
Intestinal bypass surgery, for obesity, effect on food intake and taste preferences, 779
Intestinal transit, effect of raw and cooked bran on, 1474
Intestinal transport, of triglyceride in the rat, resistance to adaptation to altered luminal environment, 157
Intestinal uptake, of vitamin D_3 970
Intestine: *see also* Gastrointestinal tract
Intestine
and protein assimilation in man, 205
small, and biosynthesis of lipids, 295
Intralipid
hyperlipemia induced by, relationship to pulmonary function, 127
in prolonged parenteral nutrition, as caloric substitute for glucose, 255
Iron
absorption
from composite meals, 772
from Southeast Asian rice-based meals, 219
in experimental blind loop syndrome, 754
dietary nonheme, absorption, 614
in mature human milk, 242
nonheme absorption, 859
Iron fortification, sugar as vehicle, 8, 274
Iron stores, in liver of Canadians, 66
Irritable bowel syndrome, fecal characteristics contrasted in diverticular disease and, 1480
Isonitrogenous diets
nitrogen retention and plasma amino acids of adults, 1343
plasma amino acids and nitrogen retention of human subjects, 1353

Jejunal enzyme adaptation, in obese adult-onset diabetics, 989
Jejunal microflora, Enterobacteriaceae in, 1397
Jejunoileal bypass, for obesity, metabolic consequences, 366

Lactation, zinc turnover in mice during, 814
Lactose
content in foods, semiquantitative determination, 428
malabsorption in Mexican-American children, 19
nitrogen and protein contents of breast milk, 1134
protein and nitrogen contents of human milk, 1127
Lactose intolerance
in adults, symptom response to lactose-reduced milk, 633
relationship to milk intolerance in young children, 192
Large bowel cancer
bacteria and diet, 1410
production of urinary phenols by gut bacteria and their possible role in causation of, 1448
Letters to the Editor, 2, 125, 235, 327, 493, 559, 689, 813, 933, 1065, 1183, 1331
Leucine, inducing changes in humans, effect of vitamin B_6, 177
Leukocytes, decreased interferon production by, in marasmus, 758
Lipids, biosynthesis in small intestine, 295
Lipogenesis, in isolated adipocytes, 540
Liver storage iron, in Canadians, 66
Low-fat meal, plasma triglyceride and cholesterol responses, 535
Lysine, in diet, 1353

Macaca mulatta, malnutrition studies, 868
Macrophage function, in vitamin C-deficient guinea pigs, 762
Magnesium deficiency, 854
Malabsorption, of lactose in Mexican-American children, 19
Malnutrition
convalescence from, and isoosmotic tube feeding formula, 496
energy balance during recovery from, 1073
growth retardation in, functional significance, 3
in *Macaca mulatta*, 868
in retarding intellectual development, 912
protein-calorie
and blood volume, 25
and bound carbohydrates of fractionated serum proteins, 146
and hair root morphology changes, 502
complement activity in children, 1089
in preschool Navajos, 657
serum and small intestinal immunoglobulin levels in children, 392
severe, and rat neocortex development, 358
Marasmus, and decreased interferon production by leukocytes, 758
Margarines, fatty acid composition, 331
Maternal characteristics, relation to nutrition and infant behavior, 305
McCollum Award, 597
Medical school curriculum, and nutrition education, 105
Metabolism
abnormalities, contributing to diabetic complications, 402
alterations after jejunoileal bypass, 366
hepatic lipid, effect of anti-insulin serum on, of BHE rats, 1190
Metabolites, intermediary, producing anorexia, 552
Methionine, and cystine lacking in diet, 1367
Mice, zinc turnover during pregnancy, lactation, and growth, 814
Micelle, mixed, binding of components of, to dietary fiber, 1461
Milk
breast, lactose, nitrogen, and protein contents, 1134
human

copper, iron, and zinc contents, 242
influence of vitamin B_6 intake on content, 961
protein, nitrogen, and lactose contents, 1127
lactose-reduced, symptom response in lactose-intolerant adults, 633
low-lactose, utilization, 739
soybean or cow's, and bile acid excretion, 546
Milk intolerance, relationship to lactose intolerance in young children, 192
Mineral losses, through arm sweat of preadolescent children, 842
Minerals, intake and status, relationship to periodontal disease, 745

Negev, 25-hydroxycholecalciferol levels in bedouins, 1104
Neocortex, in rats, development during severe malnutrition, 358
Nerve conduction velocity, and vitamin B_{12} levels, in hemodialysis patients, 691
Nerves, peripheral, abnormalities as diabetic complications, 402
Neutral sterol, and fecal bile acid in children and adults, 1196
Newborns, black, white, and Puerto Rican, anthropometric evaluation of body composition, 61
Nitrogen
balance in human nutrition, 1093
lactose and protein contents of breast milk, 1134
protein and lactose contents of human milk, 1127
sweat losses, and protein utilization, 600
urinary excretion, in low-protein diets, 639
Nitrogen balance
in septic patients receiving parenteral nutrition, 380
in small-for-date dwarfism, 38
Nitrogen retention
and plasma amino acids of human subjects consuming isonitrogenous diets, 1343, 1353
in children consuming all daily protein in one meal, 78
Nomograph, for assessment of body weight, 302
Nonheme iron, effects of calcium and phosphate salts on absorption, 1142
Nonheme iron absorption, 859
Nutrient loss, and idiopathic enteropathy in rural Iran, 169
Nutrition
American Society of Clinical Nutrition: its state of health in 1976, 1179
and high-altitude exposure in women, 604
daily intake and serum lipid levels, 1384
diet and cancer, 1035
factor analysis of nutritional status data from Ten State Nutrition Surveys, 1238

status of 617 men, 847
supplementation during pregnancy, 1376
Vitamin B_{12}
and nerve conduction velocity, in hemodialysis patients, 691

in erythrocytes, 791
stability, with ascorbic acid, 645
Vitamin C: *see also* Ascorbic acid
deficiency in guinea pigs and macrophage function, 762
Vitamin D
advances in metabolism pertaining to chronic renal disease, 1283
deficiency, and rickets, 1307
effects on bone, 1300
familial forms of rickets, 1315
metabolism of, current status, 1258
morphological effects of, and its analogs on bone, 1300
resistance in magnesium deficiency, 854
structural requirement for biological activity, 1271
Vitamin D dependency, autosomal recessive, x-linked hypophosphatemia and, 1315
Vitamin D-resistant rickets, familial forms, 1315
Vitamin D_3, intestinal uptake, 970
Vitamin E: *see also* α-Tocopherol
Vitamin E, 569
Vitamins E and C, levels in infants, 766

Weight control, behavior therapy, 880
Weight reduction
ineffectiveness of human chorionic gonadotropin, 940
in obese middle-aged women, effects of physical activity, 146
in obesity, relation to personality characteristics, 626
Weanling rats, fed maize, black beans or milk, 817
Wine, versus ethanol in human nutrition, 1093
Women
exposed to high altitude, nutritional aspects, 604
lactating, effects of diet on milk lipids, 54

Xerophthalmia, and blindness in Northeast Brazil, 116
X-linked hypophosphatemia, and autosomal recessive vitamin D dependency, 1315
Xylitol, infusion in humans, metabolic investigations, 258

Yugoslavia, growth and development in ecological settings, 1051

Zinc
body levels in celiac sprue, 371
deficiency in infants during total parenteral alimentation for diarrhea, 197
growth of infants fed supplemented formula, 1114
in mature human milk, 242
serum levels in total parenteral nutrition, 70
Zinc nutrition, of preschool children, 734
Zinc turnover, in mice during pregnancy, lactation, and growth, 814
